BUDGET PAYMENT PROGRAM INFORMATION

Hate paying high bills in the winter? The Budget Payment Program might be the answer you're looking for! The Budget Payment Program allows for equal monthly payments, as opposed to paying off entire invoices at the time of delivery.

What we do is average your previous annual propane usage plus your tank rental fee and determine an equal monthly payment for your account. This amount will appear monthly on your statement.

The program re-starts with new and revised monthly payments every May. The program ends April of the following year; this is considered your settling month. At the time of settlement, if you have a credit it will be applied to your next year's budget program payment unless a refund is requested. Otherwise all balances owing will be due and payable by April 25th to qualify & continue with the program the next year.

Your account balance will be carried with no finance charges as long as monthly payments are received by the 25th of the month. Payments must be made each month or your account will be discontinued from the program.

Sequoia Gas will periodically review your usage in comparison with your budget payment. Because our calculations are based on estimates your payment may need to be adjusted during the year. You will be notified of this payment change.

To qualify for this program, your account must have a \$0.00 balance by April 25. If you would like to take advantage of the Budget Program please contact your office today!
